As a Junior Web Developer, I bring together a unique blend of experience in customer service and sales complemented by a solid understanding of relevant technologies. I am deeply committed to continuous learning and skill development. My problem-solving approach prioritises the user's perspective, ensuring that solutions are both effective and user-friendly. I take great pride in the quality of the codebase, striving to make it intuitive for the next developer who interacts with it. With strong communication, creativity, and attention to detail, I thrive in collaborative environments, working closely with others to achieve optimal results. Having established a solid foundation in full-stack development, I am prepared to take on any challenge and make meaningful contributions to your company's projects.

TECHNICAL SKILLS

Frontend: HTML5, CSS, jQuery, JavaScript, Bootstrap, Object Oriented Programming, APIs, AJAX, ReactJS

Backend: PHP, SQL, Node, MongoDB

Command line Git, version control GitHub, collaboration tools: Trello and Jira

PROJECTS

"Team Profile Generator" | https://github.com/AnaraB/OOP_team_profile_generator
• Command line application that generates an HTML webpage on a software engineering team.
• User is prompted with questions to provide information about employees.
• The assignment requirements were: all tests pass, use OOP and command line interface.
• HTML5, CSS, JavaScript, Inquirer, Jest, TDD, OOP, Bootstrap, Command line, Node.js

"Gazetteer" | https://github.com/AnaraB/gazetteer | https://gazetteer.anara-berdalieva.co.uk/
• Map-based app to provide information on countries, with a focus on a "mobile-first" development
• Provides profiling for all countries through extensive use of third party APIs. Application had to meet all assignment criteria in order to be signed off by the tutor
• HTML5, CSS, JavaScript, jQuery, Bootstrap, Leaflet, PHP, AJAX, Remote API access, XAMPP

"Company Directory" | https://github.com/AnaraB/companydirectory | https://companydirectory.anara-berdalieva.co.uk/
• A "mobile-first" application to maintain a company personnel database (MySQL).
• The application allows the user to manipulate the database using simple interface which connects front-end components to server side endpoints. Application had to meet all assignment criteria in order to be signed off by the tutor
• HTML5, CSS, JavaScript, PHP, MariaDB, XAMPP, phpMyAdmin
